

Hiring A Mobile App Programmer for an Environmental Activism App

We are a team of faculty researchers and student designer, programmer, and copywriter at the School of Communication at UM. We are looking for a student programmer who has experience in mobile app development to join the team. This app is designed to help users develop pro-environmental habits and we already have a working, alpha version of the app.

- Compensation: The student programmer will be paid \$1,200 for her/his time and efforts in this project.
- Time commitment: The programmer is expected to start working on this project in Spring 2021, and may continue to Summer A 2021 for final modifications.

Qualifications:

- Have experiences in mobile app developments, Android or iOS (preferable)
- Have experiences in online database management
- Have experiences in or willing to learn Google Firebase and Flutter
