

Hack for NF

GENERAL EVENT INFO

Event name: Hack for NF

Date and time: October 2nd- November 13th

Location: Online

Who can join: Developers, designers, biotech professionals, data scientists, idea generators

Website: https://nfhack.bemyapp.com/?utm_source=unimiami&utm_medium=school

Prizes: \$40K prize pool | \$7.5K x 3 | \$7.5K grant prize | \$5K x 2 grant prize | Additional 1-5 teams will be chosen for incubation as well.

Cost: Free to register

The Children's Tumor Foundation wants you to join their [hackathon](#) to advance research for neurofibromatosis (NF)! If you don't know, NF is a rare disease that causes tumors to grow on nerves throughout the body. It shares a lot of molecular pathways with cancer, but is more unique and complex. The disease is not well known, but impacts over 2.5 million people worldwide.

Great progress has been made in the field of NF research, but The Children's Tumor Foundation still needs your help to improve upon the data analytics and research methodologies. Bring your data science, AI/ML, and critical thinking skills to the table to help find new insights, refine algorithms, and identify alternative approaches to therapies and research. Create a mobile engagement solution to help patients in their life journey with NF.

The hack is happening right now until November 13th. Register to have access to exclusive NF datasets, mentors, and input from real rare disease patients. Join here >> <https://bit.ly/3lFuYvw>
