

UNDERGRADUATE OR GRADUATE HOURLY PROGRAMMER

We are looking for a computer science student to work as part of a team developing a novel platform for health information technologies.

Hours per week: 20

Job duration: as soon as possible continuing through summer 2019

Qualified students should be skilled in at least one programming language (e.g. PHP) with the ability to learn more if needed. Experience with web services and frameworks (e.g. Laravel), and familiarity with cross-platform mobile app development frameworks (e.g. Flutter, React Native, Phone Gap) is preferred.

Relevant skills

- PHP7+ skills (OOP/MVC, Laravel)
- Javascript, jQuery, Ajax, HTML, CSS/SASS
- JavaScript web workers
- Creating and consuming SOAP & REST API's
- Apache Server
- Familiarity with relational databases such as MySQL

To apply, please send your CV/resume and cover letter via e-mail to Barbara Millet at bmillet@miami.edu
