

SpiderBoost Communications

Hot Job Opening: Front-End Developer Internship

[Link for candidates to apply](#)

SpiderBoost seeks a talented Intern to join our web development team and assist in website front-end code and creation of immersive website experiences. Our new intern developer must be adept at HTML, CSS, and JavaScript. In addition, experience with frameworks like Bootstrap, jQuery libraries and basic ajax knowledge are a plus.

This new teammate will work closely with creatives and experienced developers to turn ideas and designs into state-of-the-art websites. The front-end developer also will identify potential issues in user experience and provide recommendations and programming solutions to influence the design.

Responsibilities:

- Performs website analysis and design, programming, testing, debugging and documentation for assigned projects.
- Makes recommendations or demonstrates significant contributions to the success of projects by applying technical expertise.
- Leads or participates in continuous process improvement.
- Creates W3C Error Free Code.

Qualifications:

- 2+ years of programming experience.
- Passion for technology and building websites.
- Strong attention to detail.
- Personal drive, strong communication skills, and self-discipline.
- HTML, CSS, JavaScript, and an understanding of the web.
- Experience with the LAMP stack - Linux, Apache, MySQL, and PHP.
- Basic knowledge of Photoshop.

Nice to Have Skills:

- WordPress custom theming experience.
- Familiarity with emerging technologies such as Accelerated Mobile Page (AMP), or Progressive Web Apps (PWA).
- Have passion and experience for building responsive, elegant and engaging experiences with future friendly web technologies.
- Advanced understanding of CSS, including modern features such as CSS grid, flexbox, and frameworks like Bootstrap.
