

STUDENT RESEARCH ASSISTANT

Job Description:

> As a research and teaching assistant in the business technology department of MHBS, your role is to assist a professor with research projects and operational support of teaching courses. The current research projects where support with data collection and analysis is needed focus on novel business technologies including blockchain and artificial intelligence, and their transformative impact on organizations. The courses are focused on technology and innovation as well as management of digital transformation.

> Job Requirements:

> The candidate must be proficient in English, have great digital skills, excellent analytical mind and writing skills, and good at self-management to work independently and professionally. A highly desired additional qualification is detailed understanding of business technologies, demonstrated for example through a computer science, information systems, or related degree.
